

The supervisor makes a request for the student's access to the lab(s) to erica.howse@concordia.ca.

The supervisor will verify the list of trainings for the student to complete before accessing the lab.

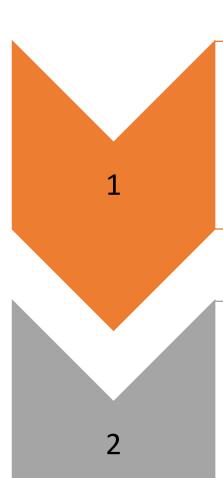

Complete the trainings and send confirmation to erica.howse@concordia.ca. She will verify with EH&S.

Once verified, access permissions will be updated in the database and will be active the following day.*

Complete the Safety Orientation Checklist with your supervisor.

*If you are a new student, and after your permissions have been granted, access cards can be picked up from the Security Desk in the Hall Building (H-118) by presenting your student ID.

Steps to Performing Experiments

Write a Safety Operation Procedure (SOP) and submit to your supervisor and EH&S as required.

If your SOP is approved by your supervisor, you may begin your experiment.
